

CASE STUDY : INDUSTRIAL MANUFACTURING

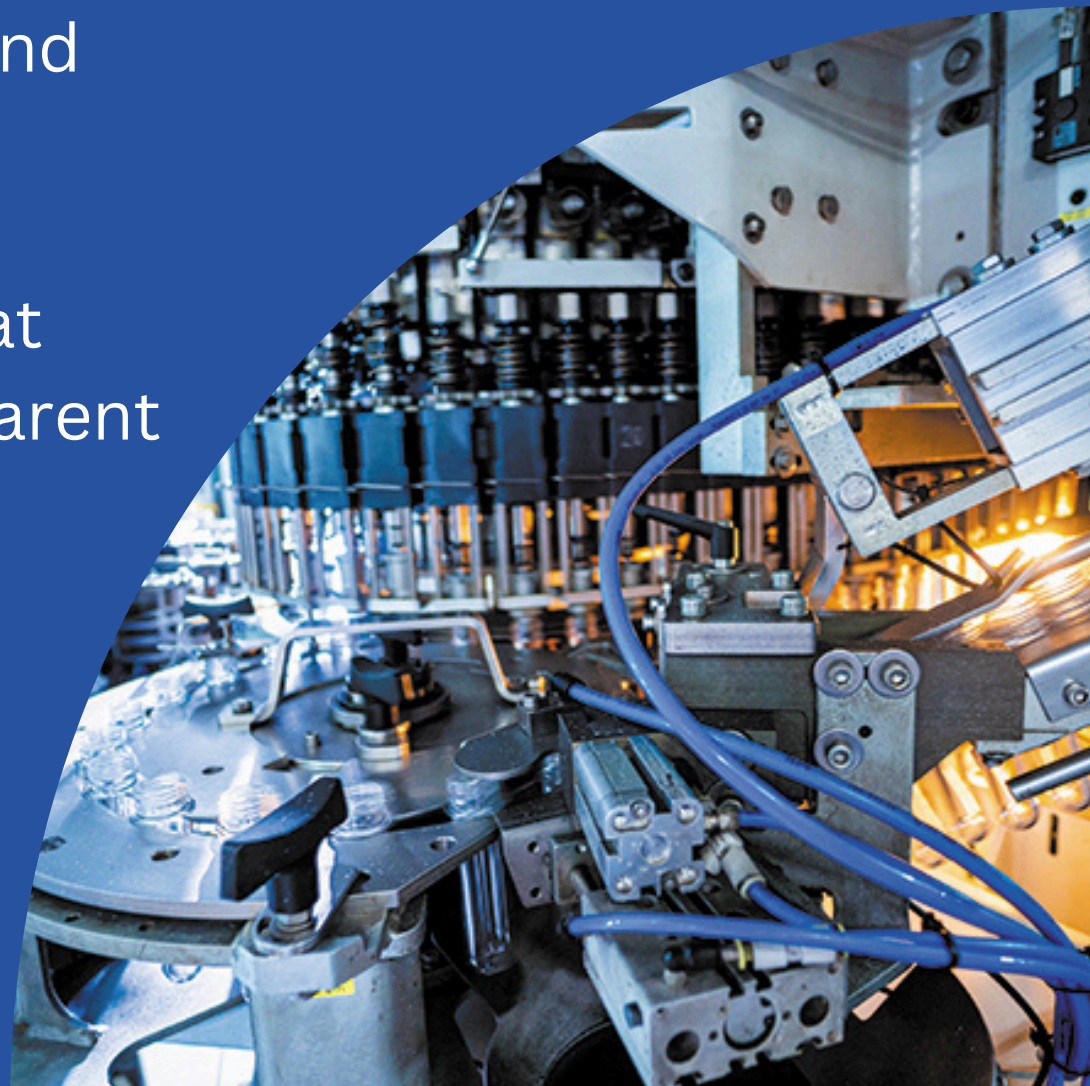

STEP .01

Data access

Industrial buyers—whether in automotive, energy, or logistics—rely on equipment-generated data to optimize performance and drive efficiency.

The Data Act mandates that businesses provide transparent access to this data.

STEP .02

Compliance isn't optional

The EU Data Act sets strict rules on data-sharing obligations, ensuring fairness in B2B relationships.

Failure to comply can result in significant legal and financial risks.

STEP .03

Data security

As industrial equipment becomes more interconnected, the risk of data misuse, leaks, or unauthorized access grows.

A well-structured compliance framework protects both the manufacturer and its enterprise customers.

STEP .04

Build trust w/compliance

At Steelbridge Oy, we're helping industrial manufacturers simplify Data Act compliance while ensuring they maintain control, security, and efficiency in data-sharing agreements.

Thank You

Is your business ready for the Data Act?
